Fifa 22 Features Key:

- FIFA 22 sees EA Sports introduce "HyperMotion Technology," a brand-new motion capture engine used in the game. This technological advancement transforms the player models and animations from previous years and uses player movements, tackles, aerial duels and on-ball actions to bring realistic footwork and explosive off the ball movement to the World Famous pitch.
- To add even more options to choosing your class of player and make both coaches and players look the part, we have now added Pro Team Coaches to the game - including the late Dennis Bergkamp, to join the team at the Theatre of Dreams! The addition of these coaches allows some of the most sought-after and coveted players in football history to come alive with their lines, formations and tactics.
 - For the first time ever, you'll be able to change player alignment in the Pro Team and in FIFA Ultimate Team - that's right, the left and right foot of each player can now move independently and individually, allowing for an unprecedented level of foot control.
 - FIFA 22 also marks the introduction of authentic European Club Linked Moments, providing the ability to create custom full player revamps using the entire playbook of licensed kits, passes and stickers for club name or crest.
 - In FIFA Ultimate Team you'll be able to create a squad from over 10,000 official players available in all competitions.
 - Completely overhauled Managerial Career Mode including extra depth and options you can impact within your club, team selections, scouting report

-
- elements and a new Rugby World Cup Internationals concept.
 - A first in FIFA gameplay, FIFA 22 will feature a modular skill progression system allowing players of all skill levels to access the brand-new abilities given to them through gameplay.
 - FIFA 22 features revolutionary new Matchday Atmosphere powered by EA SPORTS Takedown system. With real impact and responsiveness, Takedown creates a massive and accurate sense of ball flight in-game.
 - With the game's significant improvement in Physics, Ballwork, first-person view, precision passing, dribbling, new and improved ref calls, new detailed penalty kicks, improved off-ball movement - FIFA 22 has everything you want and more.
 - Build the ULTIMATE TEAM and unleash striking new features including shot animation, arrow-controlled free kicks, Rolling Free Kick and Speed Boost.

What's new:

- **Career - Play as both a manager and a player in Career Mode.**
- **Gameplay - The vastly improved PES 2016 engine powers the gameplay on Xbox One and**

PS4. Players feel lighter, more in control, and feel faster, stronger and more creative thanks to the new physics-driven tackling, lower mass, and ball control. Fans can also create custom tackles and runs to further enhance gameplay.

- **Player Ratings - Thanks to Player Ratings developed based on multiple independent sources, players show more realistic, objective and detailed attributes providing more insight on a player's abilities.**
- **Attacking - Player's passing is more versatile than ever with new powerful and precise passing tech, consisting of 'passing algorithms' and the ability to change the type of pass as the player gets closer to the receiver. Players are more refined with improved passing controls and increased timing in real-world situations with more realistic ball physics.**
- **Defensive Play - Play is completely reactive. Players automatically understand the space to fill, closing down space and moving out to intercept or make the tackle. Finally, a player is fully aware of the team-mate and can play a perfect pass or even score a goal.**
- **Tackling - New and improved tackling mechanics put players in more realistic scenarios using A.I., new tackle animations and reactions and more.**
- **Fouling - Four new foul types give players**

complete control of the contact, while defensive-minded managers can take advantage of penalty system through improved fouling awareness.

- **Creation and Interaction - Players show a more authentic presence in the environment as they are more aware of their surroundings. While scouting, players will be able to gauge their options, say hi to teammates, or talk with a ref before posing an official question.**
- **Team Play - Players and managers have a much more active role in the team concept. Pools dictate player selection, the collective intelligence of the team, as well as define their strategy. Managers can also call for substitutions based on the tactical approach, sacrificing players with skills and attributes that are less relevant, but that can improve overall team performance.**
- **Player Motion - All players are skillful in all dimensions, avoiding defenders or picking up pace for the next move. Players show more agility**
