# Hero Editor 1.14 Download [BETTER]

hi, i am trying to make a hero in diablo 2 and when i click save the game and the new class wizard thing comes up and i hit the create new character and it tells me to go to the next screen and when i do go there and hit the save button it says "no save file at this location" and then it tells me to go to the next screen and it does the same thing. can anyone help how do i make my hero edit and d2r files from another computer, if my main computer has d2r 1.14c installed. i have a brand new computer with d2r 1.14c already installed. my old computer broke, and i don't have the d2r files anymore. i want to make my hero edit to the file that is on my new computer. thanks in advance i'm having a bit of trouble with hero editor, but not with the beta or the retail versions. i'm trying to make a character, so i click on "character editor", and i go through the whole process. i add my character to the account, add him to the team, make his class, race, and gender, and i'm right at the end of the process, where i hit the "save character" button. i enter the name, and it has a little box to enter my gold, but i can't do it. when i click on "save", it just lets me click ok and closes the box without saving my gold. i tried deleting the character, and making a new one, but it did the same thing. i'm running 1.14d. hi. i tried using the hero editor to create a character and save it, and i'm getting the following error message: error : the process cannot access the file because it is being used by another process i am using a retail version of diablo ii, 1.14. i have installed the latest version of hero editor (1.14) and have loaded the appropriate save and character (diablo ii, diablo ii: lord of destruction, diablo ii: lord of destruction - lord of destruction, diablo ii: lord of destruction - trial by fire).
